19TH CENTURY ENGLISH OAK DESK WITH CARVED DRAWERS AND BRASS HARDWARE

$3,750

An English oak desk from the 19th century, distinguished by its three drawers with ornate carved fronts and brass escutcheons. The rectangular top is plain and functional, set above a frieze with an arched knee-hole design that adds both proportion and balance.

The desk's drawers are its most striking feature: the central long drawer is carved in a repeating floral motif, while the two side drawers display intricate scrollwork surrounding a central rosette. Each drawer is fitted with decorative brass hardware that complements the carved detailing. The case stands on straight legs with simple lines, allowing the richly ornamented drawer fronts to take prominence.

The combination of sturdy oak construction and decorative carving reflects the craftsmanship of English furniture makers in the 19th century, where functional pieces were enlivened with thoughtful detailing. Suitable for use as a small writing desk or side table, this piece blends utility with historic charm, making it a versatile addition to both traditional and eclectic interiors.
