EARLY 19TH CENTURY SPANISH WALNUT COFFEE TABLE WITH FORGED IRON STRETCHER

$7,900

Crafted in Spain circa 1810, this low walnut coffee table brings the quiet drama of age and artisan craftsmanship to any setting. The rectangular top is hewn from thick solid walnut with a softly uneven surface that bears the honest signs of handwork and time—visible tool marks, old knots, and a naturally weathered patina. It rests on four turned legs connected by shaped side stretchers and an elegant forged iron scrolling X-stretcher at the center. The curved tension of the ironwork, with its central twist, creates a sculptural counterpoint to the solid timber base, reinforcing the structure while adding an architectural flourish.

At 23.5 inches high, this piece functions perfectly as a coffee or cocktail table in a room that values texture and authenticity. The proportions and details reflect Spanish vernacular furniture of the early 19th century—practical, enduring, and rooted in tradition. Whether used in a rustic, Mediterranean-inspired interior or as a grounding antique in a more contemporary space, the table has a quiet authority and understated elegance born of its age.
