ENGLISH 19TH CENTURY ELM BENCH WITH SLAT BACK AND TRESTLE BASE

$5,500

This 19th-century English bench is crafted from solid elm, showcasing the warm tone and fine grain for which the wood is prized. Spanning over six and a half feet in length, the design is simple yet well-proportioned, with a narrow double-slat backrest supported by angled uprights that lend both comfort and visual lightness. The single plank seat, gently worn from age and use, rests on a trestle-style base with squared legs joined by stretchers for strength and stability. The rounded edges of the back and seat slats add a subtle refinement, while the clean, functional lines reflect the bench's utilitarian origins—likely intended for use in a public house, school, or village hall.

The naturally aged finish enhances its patina, highlighting the elm's rich golden-brown hue. With its generous size and timeless silhouette, this bench offers versatile seating for a long dining table, entry hall, or garden room, blending effortlessly into both traditional and contemporary interiors while retaining the authenticity and charm of its 19th-century craftsmanship.
