ENGLISH 19TH CENTURY OAK CORNER CHAIR WITH CARVED BACK SPLATS

$3,750

An English oak corner chair from the 19th century, distinguished by its sculptural form and traditional craftsmanship. Designed with a square seat raised on sturdy block legs connected by box stretchers, the chair features an embracing wraparound back with turned supports. Two shaped back splats add decorative interest, their pierced carvings providing a graceful counterpoint to the otherwise solid oak frame. The flat arms and curved crest rail create a continuous silhouette that emphasizes both function and form.

Corner chairs were valued in the 18th and 19th centuries for their compact footprint and their versatility, easily positioned in the corner of a room or pulled forward for use at a desk or writing table. This example reflects the robust qualities of English oak furniture, with warm tones and a patinated surface developed over time. The generous proportions and solid joinery ensure practical stability, while the traditional details lend character and historic charm. Ideal for a library, study, or accent seating in a country house setting, this oak corner chair embodies both utility and decorative presence.
